THE PROBLEM

\$200B+

Global cybersecurity market.
Zero dedicated social platform
for professionals.

4.7M+ professionals. No home.

Wrong Platforms

Twitter, Reddit, LinkedIn — none built for security professionals. No context. No trust. No tools.

Expensive Tooling

Enterprise tools cost \$10K–\$100K/year. Individual practitioners, 80% of the market are locked out. No affordable AI security copilot exists.

Zero Privacy

No encryption. No verified identity. Sensitive research and threat intel has no safe, professional home.

Why now: AI-generated attacks up 300% since 2023. Defenders need purpose-built AI — not tools retrofitted from generic platforms.

Two things no platform has ever combined.

Until now. *And it's live.*

01

Secure Professional Community

- › Public Rants — share threat intel and insights
- › Encrypted Private Rants with auto-destruct timers
- › Team Workspaces — collaborate privately with your team
- › Reputation system and verified professional badges
- › Signal Jamming — train your own feed algorithm
- › Crypto tips via Rant Tips (BTC, ETH, XMR)

02

Rant AI — AI Security Copilot

- › AI Agent for any cybersecurity task — in minutes
- › Recon, vuln research, IR, code audits, threat intel & more
- › Security code auditing and config reviews
- › Rant AI CLI — terminal-native interface for power users
- › Context-aware retrieval across your feed and DMs
- › Private workspace and session history

THE PRODUCT

Built and live across every surface.

Web · macOS · Windows · iOS · Android

Feed & Rants

Public and private rants, reshares, threaded comments, live reactions.

Team Workspace

Secure private workspace for SOC teams, red teams, and security firms. Collaborate without exposure.

Threat Intel Feed

Community-curated, trending security topics, and real-time threat intelligence sharing.

Rant AI Agent

AI agent that handles any cybersecurity task in minutes — recon, IR, code audits, threat intel, and more.

Direct Messages

Encrypted DMs with self-destruct timers. Private and anonymous messaging built-in.

Reputation & Badges

Verified certifications, CyberRanters badge, reputation scoring. Identity matters here.

TRACTION

1,366 users. \$1,690 revenue. Zero ad spend. Professionals are already pulling.

100% organic. 25-28% MoM user growth. 4-6% free-to-paid conversion vs 2-5% industry avg. All 5 platforms live.

At 1,366 users with 2–3% conversion → projected \$500–\$700 MRR · Path to \$50K MRR at 10,000 users

How we reach 4.7M professionals.

Q3 2026

Phase 1 Community Seeding

Pioneer thought leaders, cybersecurity influencers, and niche community builders. Partnership live. Target: 10K users.

Q4 2026

Phase 2 Conference Circuit

DEF CON, Black Hat, RSA, BSides. Live demos, CyberRanters badge activations on-site. Target: 50K users.

2027

Phase 3 Team & Enterprise

Team Workspaces sold to SOC teams, red teams, and security firms. B2B layer unlocks enterprise ARR.

2027-28

Phase 4 Rant AI Model

Launch CyberRant's proprietary cybersecurity AI model. Own the AI security layer, not just the community.

WHY CYBERRANT WINS

No competitor combines community + AI copilot + a proprietary cybersecurity data moat.

	Discord / Slack	LinkedIn / Twitter	HackerOne	CyberRant
Cybersecurity focus	X	X	Partial	✓
AI security copilot	X	X	X	✓
Team workspace	X	X	X	✓
Desktop app + CLI	X	X	X	✓
Encrypted private posts	X	X	X	✓
Verified professional ID	X	X	✓	✓
Community network effects	X	X	X	✓

★ The Data Moat: Every rant, threat intel post, and AI query on CyberRant trains a cybersecurity-specific model that generic platforms can never replicate. ★

Bootstrapped from day one. Skin in the game.

OA

Opeyemi Ayeni

Founder & CEO

Serial entrepreneur and cybersecurity professional. Full-time on CyberRant. Backed by LvlUp Labs. Forbes Black community member.

JK

Jeevan Kumar

CTO

Cloud, infrastructure and AI systems. AWS architecture, DevOps, platform security.

DO

David Olayide

Growth & Strategy

Spots opportunities, shapes strategy, drives CyberRant into the spotlight.

OK

Ovie Kelly

Creatives & Content

Video production and creative output. Builds the visual identity of CyberRant.

TF

Tofunmi

Project Manager

Keeps the team aligned. Ensures strategy translates to execution.

RK

Rishav Kumar

AI Engineer

Builds and fine-tunes Rant AI. LLM integration, agent workflows, security models.
