

Magic Fingers Project Document

Overview

Magic Fingers is a competitive typing ecosystem where users engage in 30-second real-time typing duels with onchain settlement in tUSDC.

Core Loop

Join → Match → Type Duel → Win/Lose → Instant Settlement → Rank Up.

Product

Real-time 1v1 typing duels, ELO ranking, accuracy + speed scoring, skill-based matchmaking.

Economy

Match fees, tournament pools, cosmetics, and future API layer.

Revenue Allocation

40% rewards, 25% treasury, 20% development, 10% marketing, 5% infrastructure.

Token Strategy

Token introduced only after product-market fit and stable usage metrics.

Roadmap

June 2026 testnet, July–Sept refinement, Q4 scaling, post-PMF token launch.
